

Cause-consequence game

Cut out the cards and line them up in a sequence that corresponds to the “cause-consequence” principle.

<p>Searching for cheap raw materials for food production</p> 	<p>Loss of biodiversity</p> 
<p>Mass commercial production of palm oil</p> 	<p>Increasing greenhouse gases and global warming</p> 
<p>Forests are being destroyed and burned, land is cleared for huge palm plantations</p> 	<p>The lives of 100 million Indonesians depend on the production of palm oil</p> 

Cut out the cards and line them up in a sequence that corresponds to the “cause-consequence” principle.
